2. Define and describe the differences between human resource planning, recruitment, selection, staffing, and retention. Do the processes of human resource planning and staffing happen simultaneously or in a more sequential, linear way?

ANS:
Human resource planning is the process of planning for the number and types of people that move into, within, and out of an organization. Recruitment is the generation of an applicant pool for a position or job in order to provide the required number and quality of candidates for a subsequent selection or promotion program. Selection is the choice of job candidates from a previously generated applicant pool in a way that will meet management goals and objectives as well as current legal requirements. Staffing is concerned with the acquisition, deployment, and retention of the accurate quantity and quality (i.e., employees with the skills, abilities, knowledge, and experience required to perform well) of employees to increase the organization’s effectiveness. Retention is maintaining a competent work force by providing employees with satisfactory compensation, rewards, and working conditions.

• global competition (e.g., repatriation, cultural diversity)
• rapid advances in information technology (e.g., HRIS and online recruitment)
• changing work force demographics (e.g., Gen X, higher expectations)
• knowledge, skills, and abilities available in the labour market (e.g., shortages in health-care professions)

PTS: 1  REF: 6  OBJ: 2
5. It is essential that human resource managers demonstrate the benefit, effectiveness, worth, and value of their staffing processes. This can be done by measuring specific criteria and/or analyzing the bottom-line costs and benefits. Describe three potential costs and benefits of an effective recruitment and selection process. Reflect on an organization you have worked for (or are familiar with) and explain how you might measure the value of recruitment and selection to the organization’s bottom line.

ANS:
Some possible costs and benefits of effective recruitment and selection are listed below.

**Costs**
- hiring a consultant or training/using an internal recruiter
- job analysis or position description
- job performance criteria
- organizational analysis
- human resource planning
- legal and ethical considerations
- reviewing the labour market and understanding/locating the target audience
- temporary filling of position (if required)
- administration (e.g., employee requisitions, use of facilities, arranging time and travel to interviews, paper, computers, telephone, forms)
- company Web page/career site
- human resource information systems and technical support
- development of a recruitment strategy
- recruitment constraints (e.g., legal environment, costs, business plan, job level and type, international assignment)
- screening (e.g., application forms, résumés, work samples/simulations, testing)
- assessment tools that measure key competencies and behaviours in a simulated situation (e.g., job knowledge interview questions, case study/incidents, job/workplace walk-through, computer-based assessment, role-play, business games, demonstration of skill, oral or written presentation, graphic representation)
- job advertisements and recruitment methods (e.g., executive search firm, online recruiters, national newspaper, professional association, private employment agencies, succession planning, campus fairs)
- applicant reviews, short listing and reference checks
- communication and sharing of accurate organization and job information (e.g., annual reports, career profiles, organizational charts, news articles)
- realistic job previews and probationary reviews
- follow-up with all applicants
- establishment and utilization of selection committee
- interviewing
- orientation, socialization, mentoring, and training
- evaluation
- lost opportunity costs (e.g., lower productivity, lost profits, lost clients)
- negative effects on morale and decreased productivity due to poor staffing processes
- international assignments (expatriate cross-cultural and language training and relocation costs)
- developing a diverse work force (e.g., generational and cultural differences)
- wrong hire, turnover within the first year
- termination and severance costs, legal fees, financial and career transition consultants’ fees
- legal expenses (e.g., contracts)
- employee referral bonuses
Benefits
• increased number of applicants attracted per method
• reduced time required to get applicants
• reduced costs per applicant attracted
• increased ratio of qualified to unqualified new employees
• reduced time from start to hiring of applicant
• increased yield ratio (the percentage of applicants from a staffing source who make it to the next stage of the staffing process)
• reduced turnover of hires
• improved performance of new hires (e.g., tracking the performance and behavioural outcomes of individuals hired)
• improved attitudes about the organization and position (e.g., measuring job satisfaction, engagement, and commitment)
• increased effectiveness of method
• improved outcome of hiring process (e.g., exit interviews and surveys)
• reduced combined costs of recruitment and selection (e.g., all costs divided by total hires)
• improved retention
• human resource planning goals achieved
• improved number and quality of applications received
• improved outcomes from various recruitment events
• improved skill and motivation among new employees
• increased productivity and profits
• reduced lead time or hiring cycle

For example, increased yield ratio, the percentage of applicants from a staffing source that make it to the next stage of the staffing process (e.g., of 300 applicant résumés, 6 offered onsite interviews = 6/300 yield ratio)

6. What are two basic principles to ensure that human resource systems function properly?

ANS:
Principle 1: Human resources management must carefully coordinate its activities with the other organizational units and people if the larger system is to function properly.
Principle 2: Human resource managers must think in systems terms and have the welfare of the entire organization in mind.

PTS: 1        REF: 13        OBJ: 1

7. What are the advantages of obtaining a professional designation such as the CHRP?

ANS:
A CHRP identifies you as possessing the required knowledge and skills to practise human resources management. It also indicates a professional who will act ethically. Recent research by HRPAO indicates that those with the CHRP have an advantage over those who do not when seeking and maintaining employment, and in terms of compensation levels and stakeholders’ perception of their achievement. Increasingly, employers are requiring the CHRP for employment of all HR professionals.

PTS: 1        REF: 16        OBJ: 4
8. What are ethics and how do they relate to recruitment and selection?

ANS:
*Ethics* is defined as the determination of right and wrong, the standards of appropriate conduct or behaviour for members of a profession, or what those members may or may not do.

All professionals must adhere to a code of ethics that dictates standards of performance. In all codes, members are required to obey the laws of the country, avoid conflicts of interest, and remain current in their fields of expertise. Ethical codes outline other obligations that their members have to clients, management, and workers, as well as to the larger society. HR ethical codes place constraints on what their members may and may not do when practising human resource management, including recruitment and selection.

There are many ethical issues that HR professionals will face when involved in recruitment and selection (e.g., equity, confidentiality).

PTS: 1  REF: 17-19  OBJ: 5

9. How can HR professionals demonstrate that they add value to a company’s bottom line?

ANS:
There are numerous measures that can be assessed in order to measure the impact of effective human resources management practices. According to your text,

- Recruitment and selection can lead to an organization’s success or failure.
- Differences in skills among job candidates translate into performance differences on the job.
- Hiring the right people with the right skills leads to positive economic outcomes for an organization.
- Effective recruitment and selection contributes to the competitive advantage of an organization.
- Best practices in recruitment and selection reduce employee turnover and increase productivity.
- Recruitment and selection contributes to profits.
- Productivity and profitability are affected by recruitment and selection.
- Employee trust is strengthened through effective recruitment and selection practices.
- The knowledge, skills, and abilities of an organization’s current and future employees are improved.
- Motivation is increased.
- Retention is improved.

Research now exists that provides data on how effective recruitment and selection practices can improve an organization’s bottom line in these areas.

ANS:

1. Globalization
   - Half of Canadian exports come from foreign markets so the country is vulnerable.
   - Globalization increases the level of competition for customers as well as employees.

2. Technology
   - Advances in technology reduce the need for labour in some industries.
   - Technology has changed the application process for applicants with less traditional means using hard copy applications and traditional media sources.
   - Technology also changes the recruitment and selection of individuals via search engines, employment testing, résumé matching, tracking applicants and employees, etc.

3. Demographics
   - The ratio of men to women in the workforce is almost at par, which gives more visibility to women, although their wages are still approximately at 70 percent of men’s.
   - Baby boomers are increasing and heading for retirement, leaving a large gap that is not being met with younger employees; families are also having fewer children.
   - Visible minorities are increasing their proportion in the population with South Asian, Chinese, Black, and Filipino making up the largest groups. Approximately 16 percent of the population is disabled but only a fraction of that are able to work—employers need to be cognizant of the disability legislation like the AODA legislation that has been instituted to protect disabled individuals and to give them a fair chance of being hired; of course, this is in addition to employment equity legislation that protects the four disadvantaged groups (women, Aboriginals, visible minorities, and the disabled)

4. Unionization
   - Although unionization as a percentage is falling with less than 30 percent of the workforce belonging to unions, professional unions are showing increasing numbers.
   - Public service employees are highly unionized at about 70 percent.
   - Unions have artificially increased wages beyond what is acceptable and there are many instances where companies close their doors only to relocate elsewhere in a non-unionized environment.

5. Economic context
   - The global recession of 2008 has had serious consequences around the world, leading to lost jobs, reduced salaries and benefits, hiring freezes, downsizing, etc.
   - Employers are finding that with labour oversupply situations, they must focus more on the selection of applicants as opposed to the recruitment of them.
   - Also best practices need to be developed to survive in the new economy where the rules have changed.
